

Emque Consultants, Inc., a developer of customizable software for the commercial construction industry, has been awarded a coveted 2013 LISA (Long Island Software Award) for the second year in a row. Emque's Payroll Time Entry app for smart phones won the award. In 2012, Emque won for it's mobile app, The Foreman.

Emque Consultants, Inc. successful development of apps for smart phones such as the iPhone and Android led to the introduction of the Payroll Time Entry app. Emque's mobile apps are also available for the new Windows 8 phones. The Payroll Time Entry app allows contractors on the job to enter hours by job and by employee then send it back to the home office by simply pushing the send key. Should an employee move from one jobsite to another during a pay period, the time is charged to the appropriate job and the time adds up to actual hours worked. The contractor can also add refined data such as classification and shift. The paycheck reflects the correct amount at the end of the week and job cost is as detailed as it would be if entered at the home office.

The LISA Awards were presented by LISTnet (Long Island Software and Technology Association) at its annual awards dinner held at the Garden City Hotel Wednesday evening, May 1, 2013. The dinner celebrates the award winners of the LISA as well as honoring select leaders within the software industry.

About the Long Island Software and Technology Association:

The objective of LISTnet is to promote Long Island as one of the national centers of excellence for Software and Technology solutions. This is achieved by facilitating collaborations between companies, establishing forums and events for the exchange of information, improving the quantity of the labor force and partnering with companies that provide the High technology Centers necessary for the growth of L.I. software and technology companies. For more information, visit www.listnet.org .
